1. Introduction

This report provides a detailed analysis of the Online Retail dataset using an interactive Power BI dashboard. The dashboard focuses on sales performance, customer behavior, and product effectiveness across countries and time periods.

2. Key Performance Indicators (KPIs)

KPI

Total Sales

Return Rate

Observed Value Description

$8.28M-0.07

Average Order Value $373.14

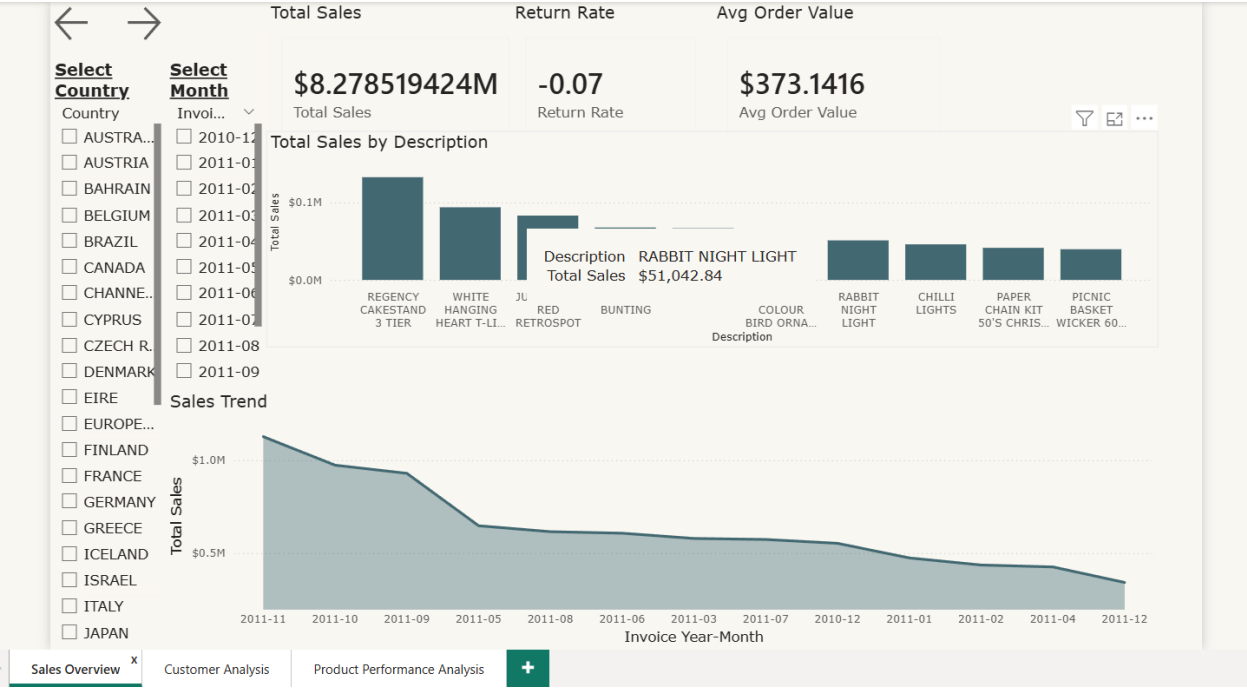

3. Sales Overview Dashboard

Total revenue generated from all transactions

Ratio of returned items to sold items

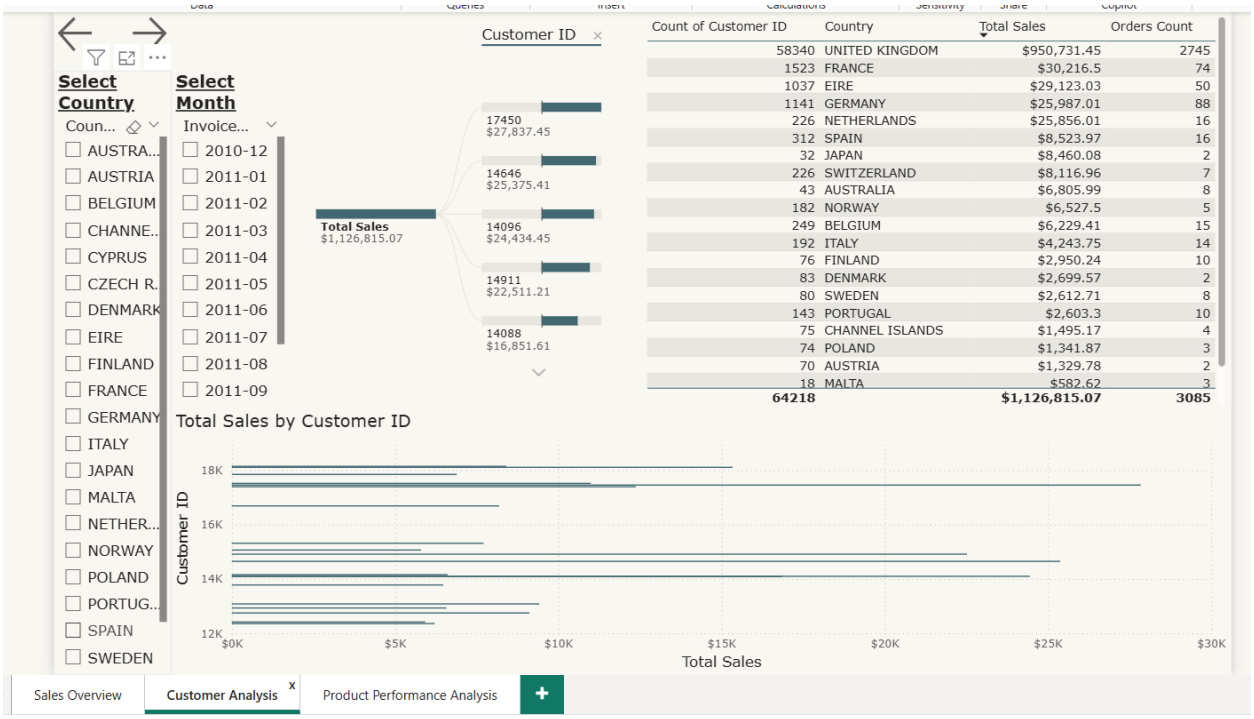

Average value per customer order

The Sales Overview page provides a high-level summary of business performance. Country and Month slicers allow dynamic filtering of all visuals. The Total Sales by Description bar chart highlights top-selling products, while the Sales Trend area chart illustrates sales performance over time, showing seasonal fluctuations.

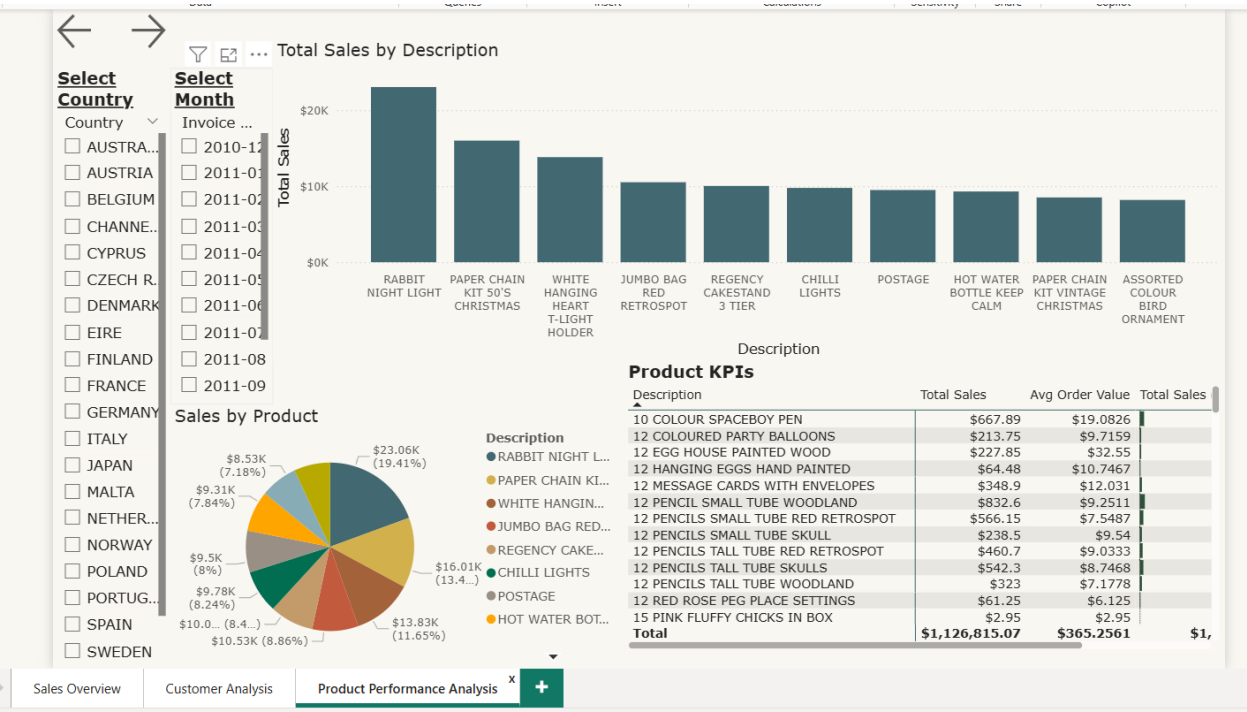

4. Customer Analysis Dashboard

This page analyzes customer purchasing behavior. A bar chart displays Total Sales by Customer ID, identifying high-value customers. A detailed table breaks down Total Sales and Orders Count by Country, revealing that the United Kingdom contributes the highest revenue.

5. Product Performance Analysis

The Product Performance page evaluates individual product success. Bar charts show Total Sales by Description, while a pie chart illustrates sales distribution among top products. A KPI table summarizes Total Sales and Average Order Value per product.

6. Key Insights

- Sales are concentrated in a small number of products and customers.
- The United Kingdom is the dominant market by revenue and order volume.
- Certain products consistently outperform others in terms of total sales.
- Sales trends indicate seasonal demand patterns.

7. Conclusion

The Power BI dashboard successfully transforms raw transaction data into meaningful insights. These insights support strategic decisions such as inventory optimization, customer targeting, and market expansion.
